Check out the Add-on Video Tutorial at ByAnnie.com for help with this project.

NOTE: Cutting Layout 1 for each fabric is based on cutting three pieces of fabric to be quilted. Cutting Layout 2 is based on quilting one large piece. For more information, see TIP below.

Use the labels on page 12 to label pieces as you cut.

NOTE: Cutting dimensions are height (lengthwise grain) of fabric x width (crosswise grain with selvages on sides) of fabric. For best use of fabric, cut in the order listed.

***TIP:** If you have a longarm (or a favorite longarm quilter), save time by quilting one big piece of main fabric/Soft and Stable/lining fabric. First, cut the pieces for the dividers from the main and lining fabric since these are not quilted. Quilt the remaining ~25" x 42/44" pieces of main fabric/Soft and Stable/lining fabric. Once quilted, you can cut all the pieces for the project from the quilted piece and have leftover quilted fabric for another small project. Note that the Side Strip will be cut across the width rather than along the length.

From main fabric cut:
