

Continuous Flow Treatment Systems

East Coast Filter, Inc.'s Continuous Flow Systems are fully automatic systems that are designed to fully treat wastewater in a variety of industrial applications.

Each system is fully designed and tested off-site to accommodate all requirements of each application. Once ready, the system can be delivered and started up immediately.

Features

- Waste Volumes from 0-60 GPM
- Treats Rinses and Concentrates Continuously
- Fully Integrated Controls
- Modular/Compact Design
- Robust Design for many different Applications

Specifications

Model	General Dimensions		Waste Volume
	Length	Width	
Module2000	21'	13'	20-50 GPM
Module3000	24'	13'	20-50 GPM
Module4000	25'	14'	20-50 GPM
Module6000	29'	17'	0-60 GPM
Module8000	30'	18' 6"	0-60 GPM
Module10000	32'	20'	0-60 GPM
Module12000	34'	18' 6"	0-60 GPM
Module16000	44'	21'	0-60 GPM
Module20000	50'	22'	0-60 GPM
