

Drum Containment Pallets

East Coast Filter, Inc. offers a wide variety of Drum Containment options. Drum Containment as the importance of securing and storing hazardous materials safely is crucial not only for the protection of the work environment, but also for the safety of all employees who work daily around the facility.

Standard Containment

East Coast Filter, Inc. Standard Containment is low profile and heavy load capacity in either two or four drum configurations. Constructed of a strong and durable All-Polyethylene media that is compatible with most corrosive chemicals meaning it will not rust or corrode.

A removable Polyethylene Grate can be easily removed for quick access to the sump area.

Part Number	Type	Size	Case Quantity
