

Poly Drum Funnel

East Coast Filter, Inc.'s Polyethylene Drum Funnels are utilized to help eliminate the possibility for spills when transferring liquids from one container to another.

The body of the Funnel is constructed of 100% Polyethylene which will not rust or corrode over time, making it ideal for chemicals. Each Funnel is designed with a Hinged, Lockable Cover for maximum user safety. The end of the Funnel has a Threaded Brass Insert which allows the Funnel to easily be screwed into a 2" Drum Bung.

Available in a Large Diameter of 22" and Small Diameter of 13.375", there is a Funnel for every application.

Features

- Wide Chemical Compatibility
- Hinged, Lockable Lid Prevents Unauthorized Access
- Built-In Vent Prevents Splashing
- Black/Red Colors for High Visibility
