

Nominal Depth Cartridge Pleated Filter

East Coast Filter introduces a new nominal rated filter cartridge, the NDC Pleated Filter.

Due to the unique design of this pleated cartridge, it provides 5 to 10 times the surface area (depending on micron). Dirt holding capacity and efficiency are maximized by pleating two layers of nominal felt to create a pre-filter and final filter layer.

The two layer pleat pack is designed for a higher flow applications with a lower initial pressure drop. Thermally bonded end caps prevent particulate by pass.

Features

- Available in Polyester or Polypropylene construction
- Micron ratings from 1 - 200
- Fits most Size #1 or #2 strainer baskets
- Polypropylene and Polyester materials meet FDA regulations for food contact under CFR21, Section 177.1520
- Broad Chemical Compatibility
- Temperature ratings to 200°F (PO) and 275°F (PE)
- Silicone-free construction
- Nominal Efficiency rating of 87%
- Buna-N O-Ring Standard (EPDM and Viton are Available upon request)

X100 Replacement End Cap

Ordering Information

| Model | Micron Rating | Media | Length | Cap Style |
|-------|--------------------------|--------------------|--------------|---------------------------|
| NDC | 1 = 5/1 Pleat Pack | PE = Polyester | 12 = Size #1 | SC = Small Cap, 6-5/8" OD |
| | 5 = 10/5 Pleat Pack | PO = Polypropylene | 26 = Size #2 | BC = Big Cap, 7-1/8" OD |
| | 10 = 25/10 Pleat Pack | | | F = X100 Replacement |
| | 25 = 50/25 Pleat Pack | | | |
| | 50 = 75/50 Pleat Pack | | | |
| | 75 = 100/75 Pleat Pack | | | |
| | 100 = 200/100 Pleat Pack | | | |
| | 200 = 200/200 Pleat Pack | | | |
