SECTION III:

COMPREHENSION TRAINING EXERCISES
INSTRUCTIONS FOR THE READER

Many people who have macular loss report that they have difficulty concentrating when they read. This section of the workbook is designed to help with this problem. Because you are used to seeing all of the letters and words on a page you may believe that you need to be able to do this in order to understand what you read. You do need to see a certain amount, but not everything.

Learning to think more actively and to skip or guess at words can aid in your understanding of text. This section contains exercises that will help you to develop these skills. This part of the workbook contains sentences,
paragraphs and stories. All of the exercises are in the same print size. The materials increase in difficulty with each level. Follow the instructions in each section to improve your reading comprehension.
COMPREHENSION TRAINING EXERCISES ————

Reading Level 1-2: Sentences ............................................. 121
Reading Level 1-2: Paragraphs ............................................. 126
Reading Level 1-2: Story ................................................... 132

  Answer Key — AMELIA EARHART-POOR PILOT? 250

Reading Level 9-10: Stories ..................................................... 253
  Answer Key — LITTERING OUTER SPACE 258
Directions: The sentences on the following pages are proverbs (P) and facts (F). Each one has a word or words left out. For each missing word there is a letter clue that is about one third the length of the word. Try to guess the word. You may need to read the sentence a few times and think about it in order to make a good guess. After you make a guess, look to the right for the answer. You do not need to write anything.
F: Fingernails grow faster than toenails.

P: The past tense of marriage is divorce.

F: The world's largest baby whale weighed four tons.

P: God never measures a man in inches.

F: A watermelon is 92 percent water.

F: “Amen” means “so be it.”

P: When fate shoots, it hits the bullseye.

F: Daniel Webster's brain weighed 53.5 ounces.

P: One blossom does not make a bouquet.

F: Crocodiles sleep with their eyes open.

F: Fish continue to grow until they die.
