DIXIE JET

Flutter Spoon

*actual size

The Dixie Jet, made of solid brass and either plated or painted with durable finishes are made to last. The finish on your jet will stay bright with a little care while its perfect action takes it down after the big ones. The Dixie Jet Spoons come with a VMC #2 treble hook, one of the sharpest on the market today.

These Spoons are 2 ¼ inches long and 7/8 inches wide and are available in 11 colors and two sizes ½ oz. and ¾ oz.

DIXIE JET

Big Daddy Spoon

The fall and movement of The Big Daddy Spoon is spectacular. The Big Daddy has the same fall and flutter action as the original Flutter Spoon and the Talon Spoon. It backs up 1 foot for every 1 foot of depth you stroke it upwards and then it flutters gracefully through the entire water column and settles on the bottom. Marine-grade brass construction with a nickel finish back and high-quality paint scheme delivers tons of flash. Big Daddy is armed with a single 2/0 VMC treble hook to ensure fish stay hooked.

It comes in at a healthy 6 inches tall and 2.5 inches wide, with a weight of 2.75 oz

DIXIE JET

Gizzard Spoon

Designed to mimic a large dying shad falling to the bottom, the Dixie Jet Gizzard Spoon is an easy snack for hungry predators. Made from marine-grade brass, the Dixie Jet Gizzard Spoon features a specially cupped shape, which allows it flutter gracefully through the water column like an injured shad and triggers ferocious strikes. It is also weighted to fall 1 foot backwards per every 1 foot of depth so that anglers can reach farther back into shaded areas like boat docks and overhanging trees. Deadly on both freshwater and saltwater species, the Dixie Jet Gizzard Spoon excels around schooling fish and high percentage targets where fish like to sit and ambush prey. Finished with a VMC 2/0 wide gap treble hook that ensures solid hook-ups.

The Gizzard Spoon comes in at 4" tall, 1.75" wide and weighs 1.50 oz.

DIXIE JET

Talon Spoon

With a fluttering fall through the water column, the Dixie Jet Talon Spoon attracts big fish from afar! These spoons have the same fall and flutter action as the original Flutter Spoon and the Big Daddy Spoon. The fall and movement of this spoon is spectacular. It backs up 1 foot for every 1 foot of depth you stroke it upwards and then it flutters gracefully through the entire water column and settles on the bottom. Featuring 3 VMC® wide-gap hooks. These sharp hooks are deadly when fish swipe at the bait but don't eat it, yet the talons will complete the hook-up. Marine-grade brass construction with a nickel finish back and high-quality paint scheme delivers tons of flash. 3 VMC (1 ea 2/0 and 2 ea #2) treble hooks to ensure solid hooksets.

This large fishing lure checks in at 6"L x 2.5"W, making it the real deal for big, aggressive fish!

DIXIE JET

Crappie Slab Spoon

The Dixie Jet Crappie Spoon delivers a fluttering, fish-attracting descent that varies in speed depending how you drop it or stroke it. This Crappie Spoon has a fish scale finish for irresistible reflection. The built-in swivel eliminates line twists and is backed with a premium VMC, 4 treble hook. All these quality components are the reason why the Dixie Jet Crapping Spoon is one of the most productive Crappie Spoons on the market. We package these spoons 4 per package/same color and we also make a variety package with one spoon of each of the 4 colors we offer: White, Silver, Table Rock Shad and Coleslaw.

1 - 3/4" long and weighs in a 1/2 oz

DIXIE JET

Pro Series Gizzard

The Pro Series Gizzard Spoon is the perfect sized spoon for almost any scenario and fits in between the Original Flutter Spoon and the Gizzard Spoon. Made from thicker marine grade brass, the Dixie Jet Pro Series Gizzard Spoon is built with Dixie Jet's signature cupped teardrop shape, which creates an irresistible fluttering action that perfectly mimics a dying shad falling through the water column. It is also weighted to fall one foot backwards per every one foot stroked up. This action allows anglers can reach farther back into shaded areas like boat docks and overhanging trees. Fitted with top-quality components as well, the Dixie Jet Pro Series Gizzard Spoon is armed with a sticky sharp VMC treble hook to ensure a high hook up ratio and a super strong stainless steel split ring that won't fail when battling large aggressive gamefish. The Pro Series Gizzard spoon casts easily into the wind and is great when using while surf fishing or windy day casting on a boat. Whether you're fishing open water, casting flats, pumping deep ledges, or vertically jigging docks, the Dixie Jet Pro Series Gizzard Spoon is great during all seasons of the year and is the perfect bait fish profile for any body of water.

3 1/4" long, 1 1/4" wide and weighs in a 1.35 oz. Pro Series Gizzard Spoons are available in 11 fish catching colors with the back of the spoons being Nickel, except our white spoon.

DIXIE JET

Falcon Spoon

Dixie Jet Falcon Spoons are the skinny Brother of the Talon Spoons coming in at half the width (1.25" wide) but just as tall (6" tall) as the Talon. The weight of the Falcon is 1.8 oz. The castability, fall and backwards movement of the Falcon Spoon is impressive. Made with Marine grade brass and cupped with the traditional Dixie bends and cups, it will back up 1 to 2 feet for every 1 foot it's lifted or stroked. This spoon casts into the wind effortlessly and falls through the water column gracefully, enticing large fish to aggressively attack it. This spoon works best on ledges, casting, trolling, or stroking in and around dock/piers/ledges or other structures. The Falcon Spoon catches fish of all species, fresh water or salt water.

Falcon's come in 5 colors: Shattered Glass, Prism Shad, Silver Shiner, Nickel and Shattered Glass Sexy Shad

Cody Huff holds a nice bass caught on a Falcon Spoon (3rd cast).

Feather Hook

When fishing, don't feed them a snack, feed them a full meal! These feathered hooks make a great accessory to our Dixie Jet Big Spoon Series (like the Talon Spoon, Big Daddy Spoon and Gizzard Spoon), Flutter Spoons and Slab Spoons. The 2/0 Feather Treble hook works best on the Big Daddy, Talon and Gizzard Spoon while the #2 Feather Treble hook works best on the Flutter Spoons and Slab

Spoons. When these feathered treble hooks are added to our spoons it boosts their size and adds additional movement making our spoons the bait of choice. Don't stop with just our spoons, use these feathered hooks to accessorize your topwater baits (Spooks, Whopper Ploppers and Red Fins), large crankbaits and other lures of choice. Each package comes with two feathered treble hooks neatly packaged keeping the feathers soft, long and protected until you desire how and where you will use them. These feathers are bright white with the 2/0 VMC Feathered Hooks measure 6 inches long, and #2 VMC Feathered Hooks measure almost 4 inches long from the top of the hook eye to tip of the end feather.

- Front embroidered logo
- 100% cotton material
- One size fit most
- Pre-curved visor
- Adjustable Velcro back

- Dad hat style
- Curved bill

DIXIE JET

Gamakatsu G-Stinger Trailer Hooks

The G-Stinger is a real innovation from Gamakatsu and is most useful when added to Dixie Jet Flutter and Slab Spoons. When G-Stinger Hooks are added to any of the Dixie Jet Spoons you increase the opportunity to catch doubles on one spoon. This happens as a result of the entire school of fish fighting to get the spoon out of the hooked fish's mouth and they see the red flash on the G-Stinger hook and eat it. The stinger is an ultra-sharp Gamakatsu hook with a loop pre-tied with heavy spectra line and is ready for use. Since they are pre-tied, you can keep them handy in your tackle bag or boat anytime you need them. Use the 1/0 on the Dixie Jet Flutter and Slab Spoons and the 2/0 on the Dixie Jet Big Daddy, Talon and Gizzard Spoons. They come 4 hooks per package.

It's back

Dixie Jet History

From the early 1960's the Dixie Jet Spoons have been catching fish of all species in clear water impoundments, inland waterways, streams and oceans. Fish have proven time-and-again Dixie Jet Spoons are the spoons of choice. You never know what you will catch with the Dixie Jet. In early 1970's production of the Dixie Jet Spoons stopped with the death of its founder. This void had many fishermen and collectors searching old tackle shops, garage sales, internet and their grandfathers tackle boxes in hopes of finding the last remaining Dixie Jet Spoons. The original Dixie Jet Spoons could be spotted by the stamped fish with Dixie Jet clearly marked inside the fish's body and located on the back of the spoon. For many years companies have tried, unsuccessfully, to reproduce the Dixie Jet Spoon with its unique fall and sound reverberations underwater. None of these companies have reproduced the "Original," until now. Thanks to Basswishes Tackle Company, LLC and Dixie Jet Lures, LLC located in Richland, Missouri, the Dixie Jet Spoons are now a Registered Trademark and are back and better than ever.
