

PRATICA (P1) BY ANFIM

The Pratica (P1) is a user-friendly grinder that maintains the essence of the Anfim grinder range, grinding for flavour.

A great commercial grinder for low volume accounts, or for use as a single or decaf grinder option, the P1 is one of the quietest grinders on the market. The quiet performance, minimal grind retention and versatility across all porta filters with an adjustable delivery chute and cradle are key factors increasing the flexibility of this model.

Efficient on the espresso bar, the P1 offers hands free activation, and the ability to program 6 recipes onto the interface. Simplifying both the workflow of the barista and the dialling in process for a variety of coffee origins, blends, or profiles.

KEY FEATURES

- Quiet and consistent grinding
- Intuitive interface for easy operation
