

SCODY II BY ANFIM

The Super Camano on Demand Display (SCODY II) is a 75mm flat bur commercial grinder.

Grinding with low revolutions and with a cooling fan to help minimise and regulate temperature, the SCODY II performs consistently in peak periods of use.

SCODY II is a great option for a medium level account looking for the best development of flavour and workflow. Micrometric grind adjustments allow the barista to find the ideal setting and control variables, while the hands-free activation allow the barista with efficiency.

A versatile grinder with an adjustable porta filter cradle, the SCODY II can be paired with all machine types and porta filter handles.

KEY FEATURES

- Hands free activation
- Adjustable porta-filter cradle for pairing with all porta-filter styles
- Programmable portion controls adjustable by steps 1/10 of a second to ensure consistent dosing
- Cooling fan and low 800 rpm burr speed minimise heat and help stabilise the internal temperature
- 75mm titanium burr set for 2500kg coffee use
