

Operating Instructions

— Non-UL Listed Mechanical Locks —

SAFE COMBINATION INSTRUCTIONS

Each AMSEC safe is professionally hand-crafted with quality materials and is equipped with a precision-quality, high-security combination lock. To become familiar with the lock, operate the lock (as outlined below) several times before closing the door and locking the safe.

To unlock the safe, turn the dial in the direction of the arrow for each number, stopping at the opening index mark located at the top (12 o'clock position) of the dial ring. You must dial the combination precisely without backing up. (See figure A).

STEP 1

Turn dial **RIGHT**, aligning first number with the opening index the fourth time it comes to the index.

STEP 2

Turn dial **LEFT**, aligning second number with the opening index the third time it comes to the index.

STEP 3

Turn dial **RIGHT**, aligning third number with the opening index the second time it comes to the index.

STEP 4

Turn dial **LEFT**, aligning fourth number with the opening index the first time it comes to the index.

Figure A

TO LOCK: Close the Door. Turn the key to the locked position. Remove the key and turn the dial either direction at least 4 full revolutions.
