

# Digital Grain Scale

## Seedburo 9000AG

The Seedburo 9000AG digital grain scale is made for years of rugged use in grain elevator grading rooms and grain inspection labs. It features sturdy stainless steel housing for heavy use, yet it is precise enough for commercial use. It automatically calculates dockage percentage, test weight results in pounds per bushel or kilograms per hectoliter and gram weight.

The built-in memory allows results to be stored and recalled, which makes calculating percentages simple. The 9000AG can be set-up for standard or reciprocal percent modes, cup selection (quart, pint, liter or half-liter), active or frozen percent. The scale has a tactile button panel, RS232C interface for connecting to a computer or printer, overload protection, removable stainless steel weighing platform, adjustable anti-slip feet, and a bubble level indicator for easy leveling. A **No. 64BP** triangular blue sample pan is included with each scale.

NTEP approved for commercial applications, approved by USDA-AMS/FGIS as well as Measurement Canada.

## Specifications

**Capacity:** 2000g

**Readability:** 0.2g

**Weighing units:** grams, Lb/Bu, Kg/Hl

**Applications:** weighing, dockage, test weight

**Approval class:** III

**Test weight readability:** 0.01 (Lbs./Bu or Kg/Hl)

**FM readability:** 0.01%

**Display size:** 3¼" (L) x 1" (W)

**Platform size:** 6" (L) x 5" (W) x ½" (H)

**Communication:** RS-232C

**Power supply:** 115/220V, 50/60Hz

**Actual dimensions:** 11¼" (L) x 8¼" (W) x 3⅝" (H)

**Shipping dimensions:** 15" (L) x 13" (W) x 9" (H)

**Actual weight:** 7.2 lbs

**Shipping weight:** 10 lbs

## Commodity Test Weight

In order to determine the test weight of a commodity, we recommend using our **No. 151** Filling Hopper and Stand to fill any of the following cups uniformly: **No. 204** Quart Cup, **No. 104** Pint Cup, **No. 203** Liter Cup or the **No. 103** Half-Liter Cup. The **No. 151** is also approved by the USDA-AMS/FGIS for official inspection.
