

# ErgoVision System

## ErgoStation -- Ergonomic Inspection Station

Inspect seed samples for purity using your choice of optical systems -- a Mantis Inspection Magnifier, a Stereo Microscope or a Video Camera.

Our Ergostation delivers greater productivity with less operator fatigue. Adjustable arm rests for user comfort.

Adjustable speed Syntron™ Vibratory Feeder moves the seeds through the field of view.

Interchangeable Inspection Trays for rapid setup for different types of seeds.

**Single Feeder for Large Seeds**  
Shown without optics

**Dual Feeder for General Use**  
Shown with Mantis Elite

**Left-Right Hand Configurable**  
Dual Feeder shown with Leica

**Dual Feeder for General Use**  
Shown with Leica Microscope
