

Model 2 Huller/Scarifier

The Forsberg Model 2 Huller/Scarifier is designed and constructed to hull/scarify seeds without damage, if operated properly. Upon entering the hulling chamber, the seed is rubbed against a heavy, rubber-lined outer wall by the inside cylinder. This action will hull and/or scarify the toughest of seeds without damage to the seed. The Model 2 hulls, scarifies and removes chaff in one operation. Hulling cylinder available in three types:

- Perf-grip
 - Linard
 - Urethane
- (Contact us for proper cylinder application.)**
