

CARDIOSPORT

GYM BIKE GOLD CONSOLE

Enhance your C510 cycling experience with the optional Cardiosport console. This console offers wireless communication to a flywheel sensor giving you instant cadence and RPM feedback along with a 2.4Ghz ANT+ auto scan transmission. Bold readouts with back-lit display make tracking your workout simple and oversized buttons help you scan information more easily.

Readouts

- Cadence RPM; Current & session average
- Heart Rate; Current, session average and % of maximum heart rate
- Training data; Exercise session time and equivalent distance traveled
- Personalized session Kcals (Calories)
- Console Low battery indicator

Features

- ANT+ interoperable 2.4Ghz wireless technology
- Best-in-class interference immunity
- Low Power consumption for long battery life
- Code memory during battery replacement
- Triple data display; Cadence, Heart Rate and Training Data
- Automatic Scan function
- Advanced energy expenditure algorithm for personalized Kcals (Calories)
- Bright Electroluminescent LCD screen light
- Dual mode ANT+ and heritage 5.3Khz analogue heart rate receiver included
- Fly wheel sensor measures rotation (included)

Tech Specs

Power Requirements Battery Operated

Model Number ZM8-3

Signal 2.4Ghz wireless radio to transmit data

Works With

C510 Indoor Cycle

*U.S. and Canada only.
