3 Safety recommendations and precautions

1. Please read this manual in its entirety before using the product
2. **WARNING!** The user while using the scooter must wear an appropriate protective equipment (a helmet, knee pads, wrist and elbow pads).
3. Always when using the scooter wear footwear.
4. **ATTENTION!** The product does not conform to general traffic regulations.
It cannot be used on roads.

5. Use of the product in traffic and in places not intended for play may endanger your health and life.

6. **WARNING!** It is necessary to make sure users with body weight over 100 kg do not ride this scooter.

7. Scooter should be used carefully, as it requires good agility, the ability to steer and to keep one’s balance as to avoid falls and collisions, which might cause injuries to the user and other persons.

8. Do not ride in darkness.

9. It is recommended to wear fluorescent elements while using scooter.

10. The risk of skidding and falling or hitting something is present when riding on smooth surfaces.

11. **ATTENTION!** Due to protruding small parts, assembly should always be performed entirely by an adult.

12. The product should be used only by one person at a time.

13. It is recommended to always have a specialist perform any repairs of the scooter.

14. **ATTENTION!** The product is not intended for jumping!

15. **ATTENTION!** You must not modify or alter the product in any way that may jeopardize the user’s safety.

16. **ATTENTION!** Always check whether the joining elements are mounted correctly. Always check the scooter steering tube locking mechanism and the steering tube height adjustment. Make sure the screws and nuts are tightened properly.

17. Immediately stop using the product if you notice damages to its structure.

18. **ATTENTION!** When assembling or disassembling the product, beware of spots where your hand could get caught or injured.

19. When using the product, always pay attention to other people and always ride at a distance from other traffic participants.

20. Only use the product on an even surface, away from streets and busy places. Avoid open water, steep or ice-covered surfaces, bumps and stairs.

21. Do not hang on nothing on handles while driving.

22. Before riding the scooter, make sure there are no pits, holes, Stones or bumps in the surface which could cause a fall and bodily injury.

23. **ATTENTION!** Never use the product when visibility is low or when it is dark!

24. **WARNING!** Do not use the product during bad weather conditions - eg rain. Risk of slipping.

25. **ATTENTION!** The brake may get hot after the scooter has been used for a while. Do not touch it before it cools down – risk of burns!

26. Keep this manual and, if possible, also the package.
4 Symbols explanations

- Symbol indicating that the manufacturer has contributed financially to the construction and operation of packaging material recovery and recycling system.
- Symbol indicating the material the packaging is made of – corrugated cardboard.
- Wear safety equipment - a helmet and pads protecting the hands, wrists, elbows and knees.

5 Kit contents

Set includes the following elements:

<table>
<thead>
<tr>
<th>Qty</th>
<th>Name of the element</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Scooter</td>
</tr>
<tr>

<td>Tool kit (1 x Allen key, 2 x screw with nut)</td>
</tr>
</tbody>
</table>

Open the package and carefully take out the scooter. Check if the product is intact and does not have any damages. In case if the product is missing any element or is damaged, do not use the product, but contact the sales person. Keep the package or dispose of it in accordance with the local regulations.

Caution! To keep children safe, do not leave packaging parts (plastic bags, cardboard boxes, expanded polystyrene elements etc.) freely accessible. Danger of suffocation!
1. Handlebar grip
2. Tiller
3. Deck
4. Foot brake
5. Wheels
6. Kickstand
7. Height adjustment Button
8. Height adjustment hole
9. Folding latch
10. Handlebar clamp block
11. Adjustment lock
12. Handlebar buckle
7 Use

7.1 Unfolding

1. Press down the latch of the folding mechanism.

2. Push the tiller forward until the latch is locked.

3. Unfold the kickstand.

4. Insert the left and right handles and lock tightly.

7.2 Mounting the steering wheel handles

1. Pull out the handle from the fasteners

2. Open the cover protecting the steering wheel lock buttons, press the buttons on the handles and then slide the handles into the steering column. The locking buttons should snap in the appropriate holes in the steering wheel.

3. Close the cover protecting the steering wheel lock buttons.

7.3 Adjusting the height of the steering wheel

1. The steering column can be adjusted in three different heights.

2. Loosen the retaining clip before folding

3. Press the locking button on the steering column and pull the steering column up or down, depending on the desired height, until the locking button snaps into one of the three holes provided. Until the locking button snaps into one of the three holes provided.

4. Close the protective clip against folding

**ATTENTION!** The product can only be used when the locking button has “snapped” into one of the three holes provided for this purpose, and then the steering column has been secured with a collapsible clamp. Danger of accident!
7.4 Folding scooters

1. Fold the steering handle by pressing the locking buttons and at the same time pulling out the handle from the steering column.

2. Place the handles in the handlebar

3. Loosen the locking clamp from the bottom of the steering column

4. Firmly press the scooter folding / unfolding lever towards the ground and fold the steering column. Tip - you can step on the lever with your foot and hold the steering wheel with your hands and pull it towards you.

5. Close the retaining clamp against folding.

7.5 Riding, braking, parking

1. Put your foot on the platform and with the help of the other leg, unleash the kick scooter.

2. In order to brake, press the rear brake or manual brake (using the handbrake lever)

3. Open the foot for parking.

**NOTE:** The product should only be parked on an even surface.

7.6 Replacement of wheels and bearings

**ATTENTION:** The condition of wheels and bearings must be observed. Use correct wheels and bearings. Wheels with different diameters or bearings with different parameters can change the driving characteristics and lead to a risk to the user’s safety.

As a result of using the product, the wheels and bearings occasionally wear out. Usage level depends on weather conditions, surface type, body weight, material and wheel hardness. It is recommended to change wheels and bearings once in a while.

Always have a specialist replaced the wheels and bearings.
8 Maintenance and cleaning

Regular maintenance enhances the safety of the scooter.

1. It is recommended that the product be thoroughly cleaned and dried after use. Remove small pebbles and other items that might have become trapped in the wheels/ sleigh runners.
2. Wipe of wet wheel bearings/ sleigh runner surfaces with a dry cloth.
3. In order to prevent rust, grease the outer side of the bearings with an appropriate lubricant.
4. Regularly inspect the condition of the wheels, sleigh runners, rigidity of assembly points, steering tube height lock, product folding/unfolding lock and the platform (for wear or damage to the an-skid surface). Also check the condition of the fixings - make sure that the bolts and nuts are tightly tightened (after some time of use, the fasteners may loosen and loose effectiveness).
5. The product should be stored in a dry place.
6. Do not make any modifications apart from described in this instruction manual.

9 Repairs

When replacing the bearings and wheels, always make sure that the new elements are of an equivalent class as those in the product specification.

When replacing the bearings and wheels, always make sure that the new elements are of an equivalent class as those in the product specification.

10 Recycling

The packing materials are 100% eligible for using them as raw materials and they are marked with a recycling symbol. The recycling of the packing should be done according to the local regulations.

11 Storage and transport

It is recommended to store the product in its original packing.

Always store the product in dry and ventilated place which is out of children access.

Protect the product against vibrations and tremors during the transport.
