

VB2

BIOETHANOL BURNER

ecosmart⁺
Fire

Whether an Edwardian, Federation, Art Deco or Art Nouveau fireplace, the VB2 has been designed to be easily integrated into existing fireplaces. The minimalist design mean you can easily convert an older style fireplace into a clean-burning bioethanol fire.

Dedicated Filling Point

A designated, inbuilt filling point to ensure the same procedures can be followed to decrease the likelihood of overfilling.

Accessory Exclusion Zone

Elevated lip around the burner mouth that stops accessories from sitting over the flame or blocking the shut off procedure. This raised lip includes air holes that allows air to flow smoothly around the fuel to achieve a better flame within the setting.

Fuel Efficiency

The burner has several layers of internal features that increases its efficiency including vertical baffles, aspiration vents and dense padding - all of which is built to last a lifetime.

Height Adjustable

Adjustable feet level and lift the burner to the best setting depending on the depth of the grill it's being placed within.

Dual Purpose Lid

A simple lid is used to extinguish the flame and cover the burner opening when it is not in use. This prevents dust from falling into the tank, leaving it clean and safe for use year round.

Included Accessories

Jerry Can

Lighting Rod + Lighter

Operations Manual

Optional Accessories

Black Glass Charcoal

Plasma Fire Screen
