High-performance Data cables within an EasyPull Box

Are you looking for a competitively priced Category 5e (enhanced) data cable with high-end bandwidth capabilities as well as being at a low price point?

The newly launched LMS Data **C-CABLE-305-UTP** is a high quality, fully compliant Cat5e UTP cable allowing deployment of current and future networking technologies up to Gigabit (1000BaseTX) devices and PoE.

With increased NEXT, ELFEXT and ATTENUATION margins, means that you have a greater scope of improved warranty passes, or put another way, previous 'marginal' passes will now give good margin across almost all critical cabling tests.

Need proof of how good our range of LMS Data cables are? Many include Delta Labs approval, including meeting or exceeding the latest ISO/IEC and ANSI/TIA standards including electrical performance, flammability and smoke environment tests\*

Offered in the proven LMS Data *EasyPull* 305 metre box dispenser which enables snag-free cable dispensing, right to the end of the box.

## specifications:

Category 5e (enhanced) UTP PVC sheathed data cable

24-AWG solid full bare copper (Cu) conductor for conductivity

Gigabit Ethernet (1000BaseT), 100BaseTX, AMT-622 certified

Ideal for PoE (Power over Ethernet) applications

High-definition colour coding on offset twisted-pair conductors

Standard grey PVC outer sheath, metre marked

### Approvals

ISO/IEC 11801:2011 (Ed. 2.2)

ETA/EIA-568B, EC Verified

1000BaseTX (Gigabit) compliant

Less cable snagging with LMS Data *EasyPull* dispenser

\* Applies to LMS Data LSZH Cable
