

C-PWR-CON-IEC20

Heavy-Duty  
Re-wirable  
IEC C20 Male Plug

## IEC C20 Re-wirable Inline Plug - 16A @ 230V

High quality, completely re-wirable IEC-C20 male inline plug assembly for all your higher power electrical applications and connections.

Ideal for higher electrical power loads such as UPS systems, Power Distribution, H/VAC and business electrical systems with an assured, higher load of approx 16A\*

Can be re-wired multiple times thanks to its robust, high-density plastic design and screw-down top cover. Complete with three, screw-down electrical terminals (L, N, E), capable of taking a higher electrical load.

Complete with a pass-thru, plastic cable boot and gripper which provides a secure grip for the incoming cable, with an approx. diameter of 1.4cm

### specifications:

Industry standards IEC-C20 MALE Plug

Rated at 250V, 16A (nominal) load requirements\*

Adheres to IEC 60320-1:2001 (2nd Ed), IEC 60320-2-2/1

Fully re-wirable with screw-down power terminals

Integral flexible cable clamp-down and pass-thru gripper

High density plastic housing - Thermoplastic

Cable entry 1.4cm (approx)
