## Quality Cable Management Solutions For Cabinets

You've got your cabinet or enclosure completed and you need an effective solution to 'blank-off'

19-inch spaces within the cabinet space.

The newly designed, lightweight **CAB-1U-BLNKPNL** is an ideal, instant fix to help tidy up the 19-inch space gaps in data enclosures and cabinets. Often when installing 19-inch rackmount products, untidy gaps may be left between the equipment, meaning cabling and other devices may be viewed through the front of the cabinet.

Quality made using a lightweight alloy construction and powder-coated in black to match the vast majority of 19-inch cabinets and enclosures on the market today.

**enclosures - power distribution - cabling**

## specifications:

**1U, 19-inch horizontal mount cable management solution**

Ideal for 'blanking-off' empty rack-mount gaps

**Quality, metal alloy construction with slotted holes**

Creates a tidy and effective data cabinet installation
