Quality Cable Management Solutions For Cabinets

Need to tidy up your wall or floor enclosure, hiding those messy data or power cables? Need to create a pleasing post-installation for your customer?

The newly designed, lightweight range of 19-inch alloy blank panels are an ideal solution for almost all types of data, telecom and server cabinets and enclosures. Rack-mounted with a robust, powder-coated finish means they are ideal for almost all vendor enclosures, from floor to wall mount cabinets and enclosures.

Ideal for creating a 'clean' looking, post installed enclosure, hiding data cables, power cables and all sorts of infrastructure clutter from the rear of the cabinet.

Available in a choice of U heights to fit your specific installation project and of course a competitive price point.
