Redefining quality compact ergonomics for servers and networking

Looking to house your latest rack-mount Server, SAN, UPS and other networking devices in a compact, universal server enclosure?

The new **CAB-FE-12U-6100** is one of the most compact server enclosures on the market today, but still has all the features IT integrators comes to expect from its larger counterparts. Full 19-inch wide profiles, front and rear adjustable profile design with a thicker gauge design to carry the extra weight of a fully populated server, UPS or other electronic networking device.

Complementing the design is the industry standard, 1000mm depth to facilitate almost all servers with the extra benefit of increased airflow. This has been further enhanced with the integral front meshed door to allow ambient air to circulate correctly and thus reduce server downtime. As with LMS Data enclosures, a fitted roof fan-tray provides effective removal of warm air from the enclosure and thus the LMS Data compact server enclosures is your ideal choice for mission critical applications - big or small.

endosures - power distribution - cabling

specifications:

12 υ CAB - F E -12U-6100

600x1000x621mm (inc. castors)

ETSI 19" front/rear profiles (adjustable)

Universal server design for all popular servers, UPS, SAN & more*

Up to 800Kg static load bearing
