## Redefining Quality And Performance in Data Enclosures

Looking for a compact but effective floor cabinet for your networking, telco or general broadcast applications?

The new **CAB-FE-20U-66** is a high-performance, professional class enclosure with an abundance of features to help with both pre and post installation operations and of course help protect your hardware assets such as generous venting, adjustable front and rear profiles, adjustable jacking feet and HD castors as standard.

As will all LMS Data EcoNetCabs in the series, bundled accessories such as installed fan tray, shelving etc are included as well as excellent ergonomics including front glass door, removable side panels and lockable rear door to house all your equipment effectively.

**enclosures - power distribution - cabling**
