Quality Cable Management Solutions For Cabinets

You've got your cabinet or enclosure and you need an effective cable management solution to correctly route data or high-tension cables within it.

The new **CAB-MAN-1U-TRUNK** is an ideal solution for almost any data, telecom, server or general purpose cabinet using the industry standard, 19-inch profiles. Manufactured of powder coated steel, the panel simply mounts adjacent to patch panels, switches, servers, PBX switches etc and not only allows a tidy cable routing procedure but also reduces cable stress by reducing the self-induced weight of copper cables, especially important in heavier CAT6, CAT6a or CAT7 FTP solutions.

To help hide cables, the CAB-MAN-1U-TRUNK comes with a clip on cover which effectively hides all cables when viewed from outside the front of the cabinet or enclosure.

Ideal for wall mount as well as floor standing cabinets, the CAB-MAN-1U-TRUNK is a cost-effective and simple way to tidy almost any cabling scenario.

specifications:

1U, 19-inch horizontal mount cable tidy with clip-on cover

Ideal for almost any wall, floor, server or data centre cabinet

Instantly tidies messy cable routing, to and from the equipment

Effectively reduces cable stress to and from equipment ports

Two large oval openings help prevent cable snagging

Multiple rear cable anchor points for securing cables

Clip-on cover effectively hides all cables from user's view

Ideal for security, public deployed equipment and more

enclosures - power distribution - cabling
