## Quality Cable Management Solutions For Cabinets

You've got your cabinet or enclosure and you need an effective cable management solution to correctly route copper, fibre or broadcast cables with minimum fuss?

The newly designed, lightweight **CAB-MAN-2U-BRSH** is an ideal, instant fix to help correct routing of data, broadcast and analogue patch cables including that of delicate fibre optic cabling. The brush strip design helps hold cables in specific arrangements, thus ensuring less cable stress, deformation of the cable itself, thus ensuring both maximum transmission performance and less signal attenuation that may effect network efficiency.

Comprising of a north-south design, nylon brush strip 'letterbox' design, cables can easily be inserted and accurately re-arranged to suit your installation requirements. Ideal for all styles of cabinets, from wall mounted to floor-standing universal server containment, the CAB-MAN-2U-BRSH is your ideal cable management solution.

**enclosures - power distribution - cabling**

**Eco**  
**NetCab**
