Multi-functional Wall Enclosures for SME Applications

SME Office Installations

Branch & Retail Offices

Educational Departments

Home Automation

Quality and security for all your networking, AV and security applications

Exceptional build-quality and a host of features. Everything you need in a compact, 19-inch wall enclosure.

The new **CAB-W6U-EL280G** is a feature-rich, small-height and shallow-depth data enclosure, powder coated with a hard wearing grey finish.

With a shallow 280mm depth (approx), this cabinet is ideal for restricted or tight fitting areas in which the normal, larger depth cabinets are not required. For example in residential homes, community areas or remote networking enclosures that do not need a large amount of enclosure space.

Fully built straight from the box, the CAB-W6U-EL280G features a front and of course reversible lockable door and front and rear vertical mount posts for secure equipment deployment.

Equipped with ventilation slots for increased equipment airflow and of course easy, single person installation makes the CAB-W6U-EL280G the ideal choice for all your small-scale equipment housing applications.

specifications:
