Illuminated Typing That's Built To Go The Distance

Bored with your regular USB keyboard and want to brighten your desktop workspace up?

The new Compoint **CP-K8800-V2** is a competitively priced but innovative full-size, desktop USB keyboard with an integral, backlit LED type illuminative effect.

Whatever the mood takes you, the CP-K8800-V2 light effect can be activated (or deactivated)*, so unlike other backlit keyboards, you have the option if you want it on or off, ideal for after hours gaming or in ours work!

Full sized, with a separate numeric pad and through better design, reduced RSI risk with a thinner profile to provide a more nature typing posture.

Just plug in and go, fully Plug n' Play for almost all operating systems including Windows(tm) and general computers, incorporating Windows(tm) shortcut keys.

Advanced features:

Full-size UK Keyboard with Windows(tm) shortcut keys

Multi-coloured LED backlit illuminated lightshow

Thin keyboard profile with tilt legs - helps reduce RSI

Plug n' Play - USB connector with 146cm cable length

Tactile feedback with up to 10 million keystrokes approx

Better and more productive workflow - during work or play

Ideal for Windows(tm) Computers, Gaming Systems etc**

Box Dimensions: 47.5cm (W) x 20cm (D) x 4cm (H) approx

An USB port is required.
* LEDs activated via **SCROLL LOCK**
