Superior stereo acoustics for entertainment & more

Are you looking for superior acoustics for your gaming, communications or general computer activities?

The new **Dynamode DH-500** stereo headset with microphone utilises *ClearSound* audio technology to give listeners deeper bass, crisper treble and higher resolution tones to help give a more natural sound, be it listening to your digital tracks, gaming or VoIP/Skype(tm) applications.

Extremely comfortable during extended use, the over head and acoustic design helps reduce ambient noise to a minimum and with cushioning on the headphone frame helps a tailored fit, no matter what size head the user has.

Complete with adjustable boom microphone with noise reduction facilities and a standard 3.5mm phono connection for audio and microphone input, the DH-500 is ideal for any computer system, media centre or professional application without the need for any messy driver installation.
