Superior Stereo Acoustics For All Your Computing Needs

Looking for a low cost but higher quality Plug n' Play Phono-type Stereo headphone for your computer or specific application?

The classic **DH-660** is a true, Plug n' Play 3.5mm Phono connected headphone set which features excellent bass and treble characteristics and at the same time being comfortable for extended periods of use.

Featuring an innovative over-the-head design with integral, soft-cushion ear cups to help reduce unwanted, external sound and the integration of an adjustable, boom microphone, ideal for two-way conversations such as Skype(tm).

Ease of use has not been left out of the design of the DH-660, so it includes a fully functional 'in-line' controller, so the user can adjust volume if required during application use.

Ideal for almost all computing platforms and/or applications, Windows(tm), Mac(tm), Linux(tm) and other project hardware, the DH-660 is ideal for all your computing hardware applications.
