Quality Power Solutions For Cabinets & Enclosures

Looking to correctly electrical Earth your data Enclosure or Server cabinets?

The LMS Data EARTH-KIT is a cost-saving, individually packed, industry standard electrical Earthing cable, ideal for when correct and safe electrical grounding is needed for your metal cabinets and enclosures.

By using electrical grounding means reduction in electrical safety hazards in which the Earth cables will be connected to the common earth studs within the cabinet or enclosure, and then to your specific grounded, external equipment such as earth bars or PDUs for example*

enclosures - power distribution cabling

specifications:

Quality, copper (Cu) alloy electrical earthing cable

Flexible, 35cm (approx) length for most types of Cabinets and Enclosures using their earthing studs*

Standard electrical loop design for fitment to compatible earthing studs - 45AMP rated

Available in single cables as standard, or multiple cables upon request

* Observe your specific electrical considerations for safety
