Quality and security for all your networking, AV and security applications

Exceptional build-quality and a host of features. Everything you need in a full-width, 19-inch wall enclosure.

The new **EcoNetCab 600mm x 600mm series** of wall enclosures are a feature-rich design, in multiple heights from just 6U, right up to the large 18U enclosure, ideal for PBX, networking, broadcast and of course CCTV and security deployment applications.

With an extra deep 600mm deep form-factor, the majority of entry to medium range networking hardware can be installed with ease, as well of course passive networking hardware including patch panels, cable management, PDUs and even rack-mount fan trays.

Following from the already hugely successful range of LMS Data EcoNetCabs, features such as front and of course reversible lockable door, removable side panels for ease of equipment access and rear vertical profiles for secure equipment fixing.

Equipped with ventilation slots for increased equipment airflow and of course easy, single person installation via the *EziMount* deployment system, makes the the new 600mm x 600mm wall enclosures the ideal choice for all your professional installations.

enclosures - power distribution - cabling
