Quality Computer Cooling With Stylish LED Effect

Looking to customise your new or existing gaming PC and need an effective cooling system, especially when overclocking?

Introducing the exciting new range of LMS Data CoolFlow **12cm fans** which are ideal for almost all computer and PC active cooling applications. Not only featuring the standard 12cm wide size but also feature both 3-pin and 4-pin (molex) power input connectors, for total flexibility.

And its not just about cooling efficiency. We know PC enthusiasts like an impressive looking machine, so our 12cm fan's coming with a super long-life LED, illuminating the entire fan in either red, blue or green (dependent on model selected).

Finally, reliability, especially when considering system cooling is never overlooked by LMS Data. Incorporating optimum angled fan blades for increased airflow and reduced noise (27dB approx) and an industry leading lifespan of around 20,000 MTBF means you can be sure of reliable and efficient system-wide cooling.

specifications:

FAN-12-ORG (ORANGE LED, 12cm)

Efficient CoolFlow turbine blades

Fan Diameter: 120mm x 120mm ; Depth: 25mm

Fan Speed (RPM): 1000rpm +/- 10%

CoolFlow Airflow (CFM): 33.689 @ 27dB

Power Connections: 3-Pin and 4-Pin connectors

MTBF: 20,000 continuous hours; Poly Carb Design

Fixing Screws: 4 Supplied as standard

FC CE RoHS COMPLIANT
