Daylight White, Low-Power LED Floodlighting

Need to install a reliable, weatherproof and fully adjustable LED technology floodlight system with advanced motion detection?

The new LMS Lighting **LED-FL20WS** is one of a new range of high-technology LED array floodlights using as much as 65% less power than competing products.

Combined with an advanced, sealed LED illumination panel generating around 80Lm/W with 20 Watts, the floodlight system is fully weatherproofed to IP44 and is constructed of low-weight aluminium and a heavy-duty, clear glass optical construction.

Integral PIR (passive infra red) detection of around 8 metres range together with adjustable sensitivity, time and LUX parameters. Stylish in design, featuring a built-in adjustable bracket for ideal placement with connecting, 3-wire flex cable.

specifications:

New-technology LED illumination floodlight - 230v/20watts

Daylight colour temperature: 4000K

Lighting angle: 110-degrees Intensity: 80Lm/W

Integral PIR detection: Adjustable LUX, Timer, sensitivity

Weather-proof IP44 rated: Heavy Duty glass optics

PIR night time sensitivity: 5-8 metres (approx)

Lifespan: 30,000 hrs or better

Aluminium construction: Built-in heatsink

Dimensions: 128x88x49mm (approx)
