LockStock Series PC Builder Cases - Jump To The Next Level

Looking to house your new, M-ATX based system motherboard into an exciting and stylish PC case, ideal for system and PC builders'.

Introducing the new range of Dynamode LockStock PC cases which will bring a new, exciting dimension to your computer system builds and add a futuristic presence for your powerful system hardware.

But the beauty is not just skin deep. Under the hood is a better designed motherboard fitment area for your M-ATX form-factor motherboard, together with a generous array of 3.5" and 5.25" storage array compartments.

External USB and HD Audio (dependent on model) are incorporated as we know this means less hassle when connecting your USB peripherals.

Finally we know you need ease of access to your valuable hardware, so all Dynamode LockStock cases are just that - easy to build, and built to last.
