The intelligent choice for electrical power protection

Are you looking for a cost-effective, rack-mount UPS with intelligent features for all types of system deployments?

The new range of LMS Power rack-mount UPS devices are ideal for computing, networks, storage and PBX systems of all sizes. The **LMSP800RI** features a long runtime 800VA battery with features not found on intelligent UPS at this low price point.

Featuring an advanced microprocessor system for efficient input and output power monitoring, the LMSP800RI also features a wide input voltage and frequency window, so can be used in a choice of geographical locations, as well as auto-diagnostics, overload protection and auto charging and shutdown when the battery is not under load.

With a low-profile, standard ETSI 19-inch rack-mount design, on-board status LCD display with audible warnings, the LMSP800RI is your ideal choice for SME electrical protection at a price you can afford.

specifications:

800VA SLA battery chemistry -maintenance free*

Supports 110/120 or 220/230/240 volts @ 50/60Hz

Line interactive technology with modified sine wave support

Microprocessor monitoring with auto-start diagnostics
