Non-Mount Appliances

Direct Mounting L-Support Rail Kit for Servers & Appliances

Looking to mount your non 19-inch mountable appliances into LMS Data enclosures?

The new range of **L-Support Rails** allow mounting of common equipment and appliance products including compatible CCTV, networking, peripherals and server devices directly into the enclosure.

Manufactured of high-grade, powder coated steel as a set of two rails, they have an approximate load capacity of 15Kgs static load. The L-Rails not only have an exact 90-degree shape but also feature both direct and 'slotted' cage holes so precise fitment can be assured*

Offered in 1000mm, 800mm and 600mm depths, the kits are ideal for most of the LMS Data EcoNetCab family of enclosures, both general networking and deeper (1000mm) server enclosures.

enclosures - power distribution - cabling

specifications:

CAB-FE-LRAIL1000 (1000mm depth)

1000mm depth (approx)

Approx. static load 15Kgs Slotted Fixing Holes

Quality rolled steel design with RAL 9004 black

Ideal for mounting non-rack mount devices, servers etc

specifications:

CAB-FE-LRAIL800 (800mm depth)

800mm depth (approx)

Approx. static load 15Kgs Slotted Fixing Holes

Quality rolled steel design with RAL 9004 black

Ideal for mounting non-rack mount devices, servers etc

specifications:

CAB-FE-LRAIL600 (600mm depth)

600mm depth (approx)

Approx. static load 15Kgs Slotted Fixing Holes

Quality rolled steel design with RAL 9004 black

Ideal for mounting non-rack mount devices, servers etc
