Gigabit Compliant Low Profile CAT6 Data Modules

Need to install a quality but cost-effective CAT6 Gigabit capable data outlet on your LAN?

The LMS Data Category 6 UTP module is a performance RJ45 data outlet which conforms to international standards of product performance.

Featuring a quality, black ABS finished plastic, the module features a spring-loaded RJ45 dust protection door together with a blank windowed ID panel for easy marking of the outlet.

Using standard colour codes of T568A and T568B colour codes on the rear of the IDC which can easily be terminated with compatible punchdown tooling, such as a Krone(tm) 2A tool.

Excellent NEXT, ELFEXT criteria means it meets or exceeds ISO-11801 class-E criteria and is fully compatible with 1000BaseTX (Gigabit) and lesser Ethernet speeds as well as telco and VoIP applications.

specifications:

Category 6 standard RJ45 UTP data outlet

Quality design using black High Gloss ABS plastic

Meets or exceeds current ISO-11801-E, ANSI/TIA-568-C

Gigabit (1000BaseTX) and Fast Ethernet compatible

High-quality rear KATT IDC, for Krone(tm)2A tooling

Spring-loaded RJ45 dust protected door and ID window

Standard T568A and T568B IDC colour coding terminals

Ideal for data, VoIP, PBX and LAN installations

Supplied with cable tie and thumb punchdown cap

Dimensions: 2.5cm(W) x 5cm (H) x 2cm (D) approx.
