

LMS Data CAT6 UTP Module

Gigabit Ready, Shuttered Data Module

LP-MODC6

Offering superior performance for your new or expanding Structured Cabling network, the new Category 6 UTP Module from LMS Data is ideal for all your installation projects.

The **LP-MODC6** is a high quality ABS plastic standard fit Data Module with performance up to Category 6. Pure white in colour, the LP-MODC6 also comes with a spring-loaded shutter which fully protects the RJ45 socket from dust ingress and thus assuring good electric contact with the RJ45 Plug.

Fully TIA-ETA-568A/B compatible and ideal for both Voice and Data applications up to 1000BaseT (Gigabit), the Module comes complete with a 'windowed' ID system allowing either hand-written or automated numbering of the outlet. Comes complete with rear cable management tidy and is shipped in the *EasiTear* Poly bag to quick access to the LMS Data Module.

Part of the Synthesis 25-Year System Warranty

Specifications

Certified Category 6 UTP Data Module

Certified Gigabit (1000BaseT) compliant

350 MHz Frequency for future Protocol support

ANSI/TIA-569-B compliant, exceeding ISO-11801

Low NEXT and PSNEXT for improved signal quality

Colour coded 568-A/B rear Krone® IDC: 22-26 Solid AWG

High quality UTP 8-Wire RJ45 socket with ID Window

Spring loaded shutter for dust ingress protection

Fully backward 10BaseT, 100BaseT, ATM155 complaint

Ideal for LMS Data Faceplates: Comes with Cable Tidy

Approx. Dimensions: 2.5cm(W)x5cm(H)x2cm(D)
