## Quality High Gloss Face-plate Series

Looking to install a high-contrast, quality ABS plastic faceplate for your standard data outlet modules?

The LMS Data series of high-gloss black faceplates are ideal for the new DDA (disability discrimination act) criteria that needs increased visual appearance of data and electrical appliance points.

Featuring a quality, high-gloss black, supplied with two, alloy screws for back box attachment.

Simply clip in one standard sized RJ45 data module and your ready to go. No need to add blanking plates for the faceplate.

Fully compatible with the rest of the LMS Data back boxes and of course high-contrast Cat5e and CAT6 data modules.

## specifications:

High-Contrast DDA (disability discrimination act) faceplate

**Quality design using black High Gloss ABS plastic**

Double gang design - x1 data module fitment

**Flat design - supplied with two back box attachment screws**

Dimensions: 86(W)mm X 86mm(H) approx.
