Your pocket power station for your latest mobile devices

Worried about flat batteries in your smartphone or other digital devices while on the move?

The new LMS Data **PBK-26-BL** is your pocket power station that fits neatly to a key-fob and is able to charge most smartphones, music players, GPS and other mobile digital devices.

Using the latest battery chemistries, the PBK-26-BL is able to give a top-up charge or a full charge (depending on battery capacity) on devices, including a top-up charge to most tablet computers from all the popular vendors from Apple(tm) and Android(tm).

On-board status LED for both charging and discharging, built-in standard USB port for connecting the bundled USB to MicroUSB charge cable, or of course use your own one means the PBK-26-BL is a truly versatile mobile charge for almost all mobile digital devices when on the move and away from home.
