Distributed Power With Assured Protection

Looking for a more specialised, higher density Power Distribution Unit (PDU) to provide power to a wide variety of devices?

The new LMS Data

**PDU-12WS-H-IEC-IEC20** is a high-density, horizontal placement PDU which features 12 standard IEC-C13 socketed outlets to provide power to networking, data centre, PBX and broadcast level power devices within the data cabinet enclosure.

Horizontal placement within almost any type of 19-inch wide wall, telco or server enclosure is assured thanks to its universal design together with a host of mounting options within the enclosure.

Coupled with a long-life, illuminated I/O Switch, certified power sockets together with a generous length power cord to the attached IEC-C20 power input plug.

## specifications:

12-way IEC-C13 Socket Power Distribution Unit (PDU)

Compliant, IEC-C20 power input plug

Illumination On/Off power-input rocker switch

Integral Grounding built into the chassis

Generous length, 1.8 metre (approx.) power cable

Lightweight, horizontal design with mount brackets

Ideal for horizontal placement in data or server enclosures

Ideal for LAN, audio-visual, PBX, VoIP and CCTV applications
