Innovative Power Delivery At Your Desk, Kitchen or Bench

Looking for a more aesthetic power delivery device for your electrical and electronic devices while keeping clutter to a minimum?

The newly developed **PDU-C-2W-2USB** from LMS Data is an ideal solution where there is a need to keep desk or work areas tidy when powering devices, thus reducing the need for messy floor extension leads, keeping your workspace tidy, the result being more productivity and less clutter.

The PDU-C-2W-2USB simply mounts on the surface, horizontally, onto an vacant desk, bench or other area whereby uncluttered UK power sockets are required.

Furthermore, the PDU-C-2W-2USB features x2 full power USB ports (5 Volts, 2.1A) so its ideal for charging USB powered digital devices such as tablets, cameras, smartphones or other devices that need USB recharging.

Supplied with bundled desktop fixing clamps (1 pair), generous UK power cordage, the new PDU-C-2W-2USB is ideal for all your professional power applications.
