Innovative Power Delivery At Your Desk, Kitchen or Bench

Looking for a more aesthetic power delivery device for your electrical and electronic devices while keeping clutter to a minimum?

The newly developed **PDU-P-3W** from LMS Data is an ideal solution where there is a need to keep desk or work areas tidy when powering devices, thus reducing the need for messy floor extension leads, keeping your workspace tidy, the result being more productivity and less clutter.

The PDU-P-3W simply fits into a pre-made aperture, normally standard in many desk and work surfaces, or may be drilled into almost any surface via a standard hole-saw*

3x standard UK 13-amp plug sockets are integrated into this stylish, neutral silver design which comes complete with a spring loaded pop-up design, built in screw-hole mount assembly and a generous 1.8 metre UK flex power cord.

specifications:

Desk or Bench, vertically fitted Mains Power Pod

Integrated, x3 UK Mains sockets with Status LED

Standard 80mm hole size aperture for desk fitting*

Total Power Pod length - 300mm (approx.)

Spring loaded push design, allows simple extension

Total desk area flush design when not in use

1.8 metre, BSI rated flex and UK plug - 13 Amps

Stylish, overall matt silver design

Ideal for desks, test benches, kitchens and A/V centres

* A suitable, 80mm Hole Saw Maybe required
