

PPAN-48-THRU

48-Port
2U High Density
Cat5e Modular
Patch Panel

Performance Graded Category 5e Connectivity

Data Enclosures

RJ45 LAN Patching

PBX and VoIP Patching

Gigabit Ethernet

Modular Category 5e Through-Coupler Patching

Need a fast and easy way to connect your existing, RJ45 terminated cables in a data cabinet with the flexibility of a modular panel layout?

The new LMS Data

PPAN-48-THRU is an innovative but cost-effective solution for anyone looking to create a high-density, 19-inch Patch Panel. Each port is fully modular, simply clip in the CAT5e UTP module in the panel port holes and your ready to go.

Ideal for when a fast LAN connection is needed and being modular means built-in fault redundancy - simply replace the offending through coupler module!

Supplied with effective, snap-on rear cable management on the two panel levels means inbound cables are held securely at all times.

Manufactured in both alloy/plastic composite for light weight and endurance.

specifications:

48-Port, High-Density 2-U Through Coupler Patch Panel

Performance Cat5e UTP certified - Gigabit Compliance

Easy-Clip, modular through coupler design*

Meets or Exceeds current Category 5e performance

Built-in LAN port redundancy - Easy to swap out

High conductive, gold-plated RJ45 connections

Individual port numbering (1-48)

Supplied with x2 dip-on alloy rear cable management bars

Supplied with standard M6 cage nuts, bolts and washers

* Patch Panel supplied unpopulated - Cat5e modules supplied
