SW2402100-POE

24-Port Fast Ethernet + 2 Port Gigabit

PoE rackmount Switch

Design subject to change.

Enabling Cost-Effective PoE Connectivity

PoE IP CCTV Cameras

PoE WiFi Access Points

PoE IP Telephones

Home, SoHo or Business

Enterprise-Class Power-Over-Ethernet Fast Ethernet Switch

Looking for a powerful, Fast Ethernet, all PoE Rackmount Switch with added Gigabit Uplinks?

Introducing the new Dynamode **SW2402100-POE** Switch with a full complement of 24-Ports Fast Ethernet together with up to 30Watts per RJ45 PoE output performance. Fully 802.3af/802.3at compliance means this rack-mount switch is ideal for various PoE devices including IP-CCTV, VoIP and other compatible PoE devices*

Increased MAC address table means its ideal for larger networking and included dual, Gigabit Ethernet RJ45 uplinks with up to 2000Mbps in full-duplex mode.

Store-and-forward IP packet functionality means less errors even on saturated LANs and coupled with advanced flow-control and back-pressure sensing means its ideal for more challenging networking environments.

Robust, all metal design, integral auto detection PSU with a standard 19-inch design means its ideal for networks of all sizes coupled with the advantages of PoE functionality.

specifications:

24-Port Fast Ethernet 10/100Mbps Desktop Switch

Advanced PoE (Power-over-Ethernet) on 24-Ports

Dual 100/1000Mbps Gigabit Uplink Ports

Supports IEEE 802.3af and IEEE 802.3at standards

Output Power Voltage: 48VDC nominal

User Port Power: 30 Watts per port (802.3at)*

Advanced Store-and-Forward IP transfer - 8K MAC

16Gbps total bandwidth, IEEE 802.3x flow control

Dedicated Uplink Port with Auto X-over

Internal PSU (AC 100-265V @ 60Hz, 400W Max)

Robust, all-metal 19-inch rackmount Design

*Please check if compatible with your existing PoE device

CE FC RoHS COMPLIANT
