USB Enclosure

Your pocketable data storage solution - just add your own hard disk

Windows(tm)  
USB storage

Mac(tm)  
USB storage

Movie & audio  
storage

Backup  
& restoring

Re-use your existing SATA hard disks for immediate USB data storage

## Looking for a low-cost way to use your existing hard disk from your old laptop or PC?

The new **USB-HD2.5S** is a stylish, aluminium manufactured enclosure for almost all 2.5 inch SATA interface hard disks as found in laptops or desktop computers using Windows(tm), Mac(tm) and many other systems besides.

Also compatible with the new generation of 2.5 inch SSD (solid state disk) drives\*, the USB-HD.25S allows anyone, regardless of computer skills, to simply insert the hard disk in seconds. Tooling and carry pouch is also supplied.

Your convenience is our number one priority and as such the USB-HD2.5S is self-powered by the supplied USB2.0 data cable, so no messy power cables are required. Whats more, the aluminium housing is only slightly larger than your hard disk, so, its easy to fit in your pocket.

Ideal for all operating systems, its an ideal storage device for movies, digital music, photo's and much more besides with the added benefit of compliance with integral and third-party backup apps such as Time Machine(tm).

## specifications:
