A Sound Investment For Your Computer

Need a replacement sound card for your Laptop or PC? Want to upgrade with minimal fuss to the latest virtual surround sound system?

The **USB-SOUND7** is a compact, USB connected 7.1 virtual surround sound system that simply plugs into a USB port on your Windows(tm), Mac(tm) or Linux(tm) based notebook, desktop or PC.

Ideal for a quick and simple audio upgrade experience, moreover the USB-SOUND7, you'll immerse yourself in a surround sound experience with deep bass and crisp treble, ideal for gamers, watching movies, multimedia and business presentations.

Not much bigger than a regular USB memory stick, the device features standard phono audio outputs plus a standard phono input for your microphone, so ideal for VoIP applications including Skype(tm).

On-board audio controls are included and of course the USB-SOUND7 is compatible with popular operating systems including Windows(tm), Mac(tm) and Linux(tm) runtimes.

specifications:

Virtual 7.1 surround sound audio experience

Replace your existing Sound Card - instantly

Plug n' Play USB interface - installs in seconds
