Gigabit Ethernet Networking For USB3 Interfaces

Looking to add Gigabit Ethernet speed to your USB3 port on a notebook or desktop computer.

The new **USB3-CAB-RJ45G-G** is a high-performance, gigabit ethernet (1000/100/10Mbps) adapter that simply connects to your existing SuperSpeed(tm) USB3.0 port found on most recent Windows(tm) and Mac(tm)OS X compatible desktop and laptops.

Levering the true power of gigabit ethernet including support for full-size, jumbo packet sizes, large buffer memory and of course full-duplex power to give up to 2000Mbps transfer rates.

Ideal for business and private users alike, the USB3-CAB-RJ45G allows super-fast IP data transfer, so its idea for almost all applications, from online movie streaming, database access or even a more fluid gaming experience.

Ideal for Windows(tm), Mac(tm) OSX and is fully Plug n' Play with desktops, servers, MacBooks(tm) and even compatible TV boxes and Media Centres.

specifications:

USB3.0 Compatible Gigabit (1000/100/10Mbps)

USB2.0 Backward compatible (100/10Mbps)

Supports Full/Half Duplex for speed adaption

Jumbo packet size support for true Gigabit

Industry-standard 802.3, 802.3u, 802.3ab
