WL-700N-RXS

802.11n
150Mbps
wireless USB
adapter

Desktop and Server computers

Notebooks and MacBook(tm)

Tablet computing

Multimedia players

Big on performance. Small on size for your portable devices.

The latest generation of ultra-compact 802.11n USB adapter sacrifices size but not at the expense of wireless performance.

Utilizing the Ralink(tm) 5370 wireless signal chipset in a radically new and compact design means the **WL-700N-RXS** is an ideal, permanently placed device in any vacant USB2.0 port on your notebook, MacBook(tm) or even your desktop computer.

Allowing speeds of up to 150Mbps at up to 150 metres in range* the **WL-700N-RXS** does away for the need for legacy and of course much larger wireless devices, meaning power consumption if further reduced, ideal for small-form factor computers with limited battery capacities.

Of course wireless security as well as ease-of-use is paramount. Built-in support for the latest WPA2-PSK encryption as well as legacy WPA and WEP as well as enterprise level 802.1x support is assured. And with enhanced support for multimedia wireless streaming together with QoS (quality of service) means you'll get a more immersive wireless experience.

specifications:

802.11n 1T1R - up to 150Mbps wireless speed*

Ralink(tm) 5370 chipset for better power management

Nano size technology - ideal for notebook devices

Plug n' Play USB interface - sits near flush within the port

QoS and WMM for a better multimedia experience

Advanced encryption - WPA/WPA2-PSK and 802.1x

Compatible with Windows(tm) 98/ME/2000/XP/Vista

Compatible with Windows8(tm) and Windows8(tm)

Compatible with Mac(tm) OS X (10.6 +), Linux(tm) runtime

* actual speed and range dependent on environment factors.

CE FC RoHS COMPLIANT

Windows 8   Mac

Dynamode
