Kid's Foot Sizing Chart

- Print this document on an 8.5" X 11" piece of paper (this is a normal piece of paper if you live in the U.S.)
- Do **NOT** let your printer scale the document to fit the printable area.
- To make sure your size chart has printed correctly put a credit card on the accuracy checker below.

Finding the Right Size

- Place your child's shoeless foot with the heel along the line at the base, barefoot or with snug socks is fine.
- The line that touches the longest toe is the correct size.
- Make sure to measure both feet sometimes they are two different sizes. Purchase the size that accomodates the larger foot.

Roomy Fit

- ikiki Shoes and Sandals have a roomy fit. For skinny feet that are inbetween sizes the smaller size will usually fit well.

NOTE: Print Actual Size. Uncheck "Fit to Page", "Shrink Oversized Pages", or similar options when printing

Accuracy Check

Place a credit card here.

If the credit card fits this box, your chart was printed correctly.
