

Feather Plucking Rescue Pack

First we would like to Thank You, for doing the research and taking the necessary steps to get your Bird the help he/she needs. Please understand that the condition your bird is in, will get **better!**

Directions

BIRD If your bird is not listed, use one that matches closely in size.	CALCIBOOST 5 days a week for 1-2 months (considered the "loading period")	EASYBIRD COMPLETE PET SUPPLEMENT 5-6 days a week for life	POTENT BREW 5 days a week for 1-2 months
Parakeet	2 drops	1-2 small pinches	2 drops
Cockatiels	4 drops	2-3 small pinches	4 drops
African Greys	15 drops	1/4 heaping teaspoon	15 drops
Cockatoos	10-20 drops	1/2 heaping teaspoon	10-20 drops
Large Macaws	30 drops	1/2 heaping teaspoon	30 drops

Your bird must consume the amounts listed on this table to see results.

Follow this table by adding these products on soft food (ex: toast, cracker, eggs, apple etc,) soft-food will absorb and hold the product, so they can consume it. You can do this once a day or break the portion size up and give it 2-3 times per day. Whatever is needed to get your bird to consume the amount listed in the table.

Products cannot be applied to seeds, as the seed is shelled by your bird and discarded. So the product would not be consumed.

Don't be surprised if your bird improves and the relapses during the "loading period". Some birds struggle to control their blood calcium levels during the first few weeks. The "off days" in our regime, exercise the ability to move calcium from store to blood and in the long term will give you much more consistent results. If your bird relapses in the future simply reload with Calciboost.

Not getting results? Don't understand the directions? Just need help?
